

APCTP Conference

String theory, gravity and cosmology (SGC2020)

Period November 18 (Wed.) ~ 20 (Fri.), 2020

Venue Online & #512, APCTP Headquarter

* The ZOOM links will be available to participants on Monday, November 16th.

Overview The scope of the workshop focuses on string theory, gravitation and theoretical cosmology. In particular, it pursues the inter-communication among those three fields. Also a few of observational cosmologists will be invited to report the recent observational results. In doing so, the theorists can come up with the observational constraints in building the theoretical models.

The speakers present their recent progress and have intensive discussions from which the participants can build up collaborations in these fields. The contents of the workshop will provide young postdocs and students with a good opportunity of tutorial for their research works.
